Energetic, impact-driven senior technology executive (CTO/CIO/CAIO) with 20+ year track record of building, growing, and transforming Data, Engineering, and AI practices at F500, large multinational private, and early-stage companies.

Entrepreneurially minded executive leader with extensive experience in data, analytics, and AI. Unique mix of McKinsey-honed business acumen + PhD-level quant expertise. Deep track record of operational roles building/leading enterprise data/analytics/AI practices. Principal consultant to multiple F500 and private clients on data/analytics/AI strategy. Able to engage at most senior level on strategy and opportunities at intersection of technology and enterprise.

- ⇒ Built/ led first Data Science practice as Chief Data Scientist at Sears Holdings (NASDAQ: SHLD)
- ⇒ Built/led first Big Data practice at Seagate Technology (NASDAQ: STX)
- ⇒ Stanford-educated PhD statistician and machine learning expert
- ⇒ McKinsey-trained business strategist and executive consultant
- ⇒ Led data science partnership w/ US DEA to speed identification of leads in opioid OD cases
- ⇒ Created “GenAI for Business Leaders” & “Data Science for Business Leaders” executive programs for Udacity/Accenture
- ⇒ Expert at recruiting/retaining/developing outstanding talent from top schools/programs

PROFESSIONAL EXPERIENCE

DELAWARE NORTH, Buffalo, NY

2024 – 2025

Senior Vice President, Data & Analytics

Led 75-person function comprised of Data, Analytics, and Labor Management teams for a \$4.5B hospitality company. I inherited operations that had largely failed to deliver value despite 6 years and >\$50M invested, with ongoing struggles with poor data quality and limited analytical maturity.

- Designed and led enterprise-wide Data & Analytics transformation to prioritize rapid enablement of data and analytics capabilities and higher-quality client delivery.
 - Restructured Data Engineering team, eliminated two management layers, and enabled platform rebuild for 5x increase in processing speed at 85% lower compute cost.
- Executed over \$7M in annual cost takeout, representing 35% budget reduction.
- Led AI Acceleration effort that mentored 20 BU leaders to create pilot-ready AI use cases.
- Drove implementation and adoption of first enterprise solution for AI-enabled analytics.
- Engaged first offshore data engineering team to enable 80% cut in data eng labor spend.
- Cut \$4M (~3.2%) in operational labor spend for 2nd-largest BU via labor optimization efforts.

ED WILEY VENTURES, LLC, Boulder, CO

Since 2008

For nearly two decades, as both main and side gigs, I've built a robust consulting, advising, and investment practice. Recent engagements have tended to serve CxO clients at companies with revenues in the \$1B-\$10B range, typically focusing on strategy and organization for functions related to Data, Analytics, AI (including GenAI). Recent engagements include:

- Enterprise GenAI strategy & productivity capture for large-cap financial services company
- Engineering transformation for large-cap information services company
- Enterprise GenAI strategy for large cap online retailer
- Data & Analytics strategy and implementation for >\$5B footwear and apparel retailer
- BI and Data Analytics strategy for a >\$5B consumer packaged goods company
- Machine Learning strategy for leading national telecommunications company
- Data and Analytics strategy for >\$3B logistics and ecommerce company
- Machine Learning strategy for a >\$40B international manufacturing leader

OP SIS HEALTH, INC., Golden, CO

2021 – 2023

Chief Technology Officer (2021-2023)

I assumed responsibility for all technical and engineering-related activities for Opsis Health, a Series A healthtech startup, after the failure of a 2-year app build effort led by Founder/CEO.

- Recruited and led team of 40 FTE and contract machine learning engineers, cloud architects, data scientists, and product and software engineers.
- Led full re-architecture of app from monolith to cloud-native microservices architecture.
- Cut >\$8M in annual spend by ending relationships with incumbent development partners and sourcing higher-quality, more efficient contracting partners.
- Launched "Plateful", a nutrition guidance application available in both Apple and Google Play App Stores. Executed successful build to deliver first product to market in <4 months.

ENVEDA BIOSCIENCES, San Francisco, CA

2020 – 2021

Chief Technology Officer

Technological leadership for seed-stage biotech backed by True Ventures & WireFrame Ventures.

- With Founder, successfully closed over-subscribed seed round during COVID-19 pandemic.
- Drove transformation of all tech systems/practices in advance of anticipated Series A raise.
- Built machine learning infrastructure to support all stages of drug discovery efforts.

NURX, San Francisco, CA

2019 – 2020

Vice President, Data & Machine Learning

Led company-wide adoption of machine learning capabilities to scale product offerings while maintaining first-rate patient care for well-backed (Kleiner Perkins; USV; YC W16) Series C startup.

- Senior Leadership Team member for high-growth startup serving >250k patients.
- Recruited and led two teams of machine learning engineers and data scientists.
- Built ML infra for production ML models for Rx optimization and message/ticket routing.
- Used ML to optimize RN response to patients, cutting response times by average of 60%.

PENLINK, LTD., Boulder, CO

2016 – 2019

Chief Innovation Officer (2017-2019); **Chief Data Scientist** (2016-2017)

Led innovation and machine learning initiatives for professional services & software company that served nation's top law enforcement agencies (e.g., DEA, FBI, US Secret Service, and US Marshals).

- Drove transformation to cloud that now underpins next-gen software suite.
- Spearheaded development of *NetViz*, PenLink's first SaaS offering, bringing product to market in <6 months, and acquiring >200 federal, state, and local agency users in first year.
- Led development of cloud-based analytics solution that reduced time for DEA agents to identify leads in opioid overdose cases by >96% (from days to minutes).

SEARS HOLDINGS, INC., Chicago, IL

2015 – 2016

Chief Data Scientist, Pricing & Promotions

Set data science strategy for capturing \$100+ margin opportunities in pricing and marketing. Drove strategy through direct interaction with CEO and business unit leaders.

- Built (from scratch) team of 41 fulltime and contract data scientists from top schools/firms.
- Built basic promo price optimization engine; margin impact across first 3 product lines: +2.54% (air compressors), +2.23% (mechanics' toolsets), and +6.48% (coffeemakers).
- Projected >\$150M margin impact with full catalog adoption of price optimization engine.

SEAGATE TECHNOLOGY, INC., Longmont, CO

2013 – 2015

Head of Big Data Analytics

Built and led Seagate's first Big Data Analytics team of nine top data scientists.

- Team developed first-ever Hadoop-Lustre connection, allowing Hadoop to replace HDFS storage backend with high performance Lustre file system

UNIVERSITY OF COLORADO, Boulder, CO

2004 – 2011

Chair & Assistant Professor, Research and Evaluation Methodology (2004 - 2011)

- Chaired doctoral program of six tenure-track faculty & 30 doctoral students.
- Taught graduate level courses in advanced statistics, data science, and machine learning.

MCKINSEY & COMPANY, INC., San Francisco, CA

2001 – 2004

Senior Strategy Associate

Advised top tech, retail, financial svcs, & institutional investment clients on strategy & innovation.

- Recognized as Firm expert in hedge funds, PE, VC, & natural resources investments.
